THE ONGOING GENOCIDE AND EXTERMINATION OF PALESTIINE

Since the inception and creation of Israel by the collective Western Imperialist nations, there has been one clear aim of the violent terrorist settler colonial Zionists. It is ,and always was the aim to remove with whatever means, the indigenous populations of historic Palestine, whether they be Muslim, Christian, (or even Jews opposed to the settler colonial project).

Israel has a clear strategy to achieve this. First force out the Palestinians, then move in their place violent settlers and consolidate. They have done this to Lebanon, Syria, The West Bank, and now doing it in Gaza. There is supposed to be a ceasfire, yet Israel is still occupying, and genociding with impunity. This will never stop until the world starts to do something.

Our corrupt states, which are profiting from Genocide, facilitate protests to provide a veneer of democracy. Protests are good, but it is not enough to achieve tangible results. We must do more to bring about change. Organisation, logistics , Supplies, Props, leaflets, Posters and funds. They don't appear magically, somebody has to do it. We are stretched to the limit.

People are our greatest resource.
